# EPA TESTING METHOD 5035A PRODUCTS FROM ESS VOC'S IN SOIL

## ESS CORE N' ONE<sup>™</sup> **5 GRAM CAPSULE AND HANDLE**

- CNO is both a soil collection and transportation device
- Screw-threaded Septa closure ensures airtight seal and "zero headspace"
- CNO Capsule incorporates extruding feature; no need for expensive tools
- CNO Handle is strong, economical and easy to use

#### ESS LOCK N' LOAD™ **HANDLE AND SYRINGE** (For Field Preservation Technique)

- Handle locks at 5 and 10 gram settings with one easy turn
- Beveled-edge syringe is stronger than cut syringes and fits in the neck of 40mL glass vials
- Turn handle and push to dispense soil sample into vial — no need to remove the syringe
- Strong, accurate, easy and economical

### **5035A SAMPLE KITS**

For Field Preservation Technique
